Circadiance® Synergy Cloud

Synergy Cloud Communication Module

Remotely monitor your NICU graduates

Transmit Data from Patient Home to Synergy Cloud in One Easy Step

The Synergy Cloud Communication Module was created to connect SmartMonitor devices to Synergy Cloud software over a Wi-Fi connection. This removes the need to drive to patient homes or use cables to pull data from devices. The Communication Module means remote patient monitoring is easier than ever.

This new device provides the following benefits:

- Removes need to drive to patient homes to retrieve data
- Score anytime, anywhere on Synergy Cloud software
- Retrieve data as often as the clinician requests
- Can send download before bringing baby back to clinic
- Easy-to-use
- Creates profitability

The Communication Module features:

- Wi-Fi Connection
- Touchscreen display
- Rechargeable battery
- Compatible with all SmartMonitor 2 models
- Sends patient data to Synergy Cloud
- Secure and HIPAA compliant
